PART C – EVIDENCE TO SUPPORT VARIANCE

Provide documentation to support you request. Documentation should concisely prove the need for a
variance. Please list documents below and attach copies with your application. Original records will not
be returned.
Attached is a sketch showing the proposed location and lines for the new grease trap at Peet's. While cost
estimates have not been solicited for hooking up all sinks and floor drains, it is anticipated that it would
add several thousands of dollars to the project, but most importantly, it is the disruption of service to the
students and staff of this popular location with minimal, if any, benefit to capturing FOG that is of
concern.

PART D – REQUESTED ACTION				
What specific action are you requesting that	the Board take?			
CSUMB is asking the Board to grant a variagrease trap, as this would cause an undue ha	nce that the small han	d sink and floor dr	ain do not need to	o be attached to a
significant adverse impact to the sewer syste		ty and its students	and starr and not
