

70% agree that MCWWD's infrastructure should be modernized and upgraded even if that means higher rates

Question 21: Agree or disagree: Marina Coast Water District's infrastructure, such as water pipes and storage tanks, should be modernized and upgraded even if that means higher rates.

66% have a more favorable view of MCWD after learning that MCWD is refurbishing the desalination plant to be back online in 2025

Question 41: MCWD's Reservation Road desalination treatment plant was placed into operation in January 1996 and operated for seven years. Since then, the plant has been on standby. Over time, technology has improved significantly, and the District is refitting and refurbishing the plant in preparation for placing it back online in 2025.
